Overall Portfolio (Blended)	+11.74%	+12.47%	+12.49%	+14.03%	+14.03%

Benchmark rows shown in tinted rows directly below each fund. Blended return = value-weighted average across all funds.

Overall Performance Commentary

Portfolio Overview

The equity-focused portfolio comprises eight diversified equity mutual funds spanning large cap, multi cap, flexicap, and mid cap categories. All funds are held under regular plans with growth options, providing exposure across market capitalizations through established fund houses including HDFC, Kotak, Mirae Asset, UTI, Canara Robeco, and Invesco. The portfolio demonstrates a well-diversified approach across different investment styles and market segments. Performance measurement is based on XIRR calculations compared against relevant benchmark indices over a one-year period.

Equity Portfolio

The equity portfolio has delivered strong outperformance across most holdings, with seven out of eight funds beating their respective benchmarks. Invesco India Large & Mid Cap Fund emerged as the top performer with an exceptional XIRR of 20.66% against the Nifty LargeMidcap 250's 8.98% return. Other notable outperformers include Kotak Flexicap Fund at 17.07% XIRR and HDFC Large and Mid Cap Fund at 15.14% XIRR. However, Kotak Midcap Fund underperformed with an 8.53% XIRR compared to the Nifty Midcap 50's 12.30% return, and HDFC Multi Cap Fund showed modest outperformance at 5.65% versus the Nifty 500's 7.98%.

Hybrid Portfolio

No hybrid fund holdings were identified in the current portfolio composition. The portfolio maintains a pure equity allocation strategy without any debt or balanced fund components. This approach reflects a higher risk appetite and growth-oriented investment objective.

Quarter in Review

While specific quarterly data is not available in the current dataset, the one-year XIRR performance indicates strong momentum across the equity portfolio. The outperformance across multiple fund categories suggests favorable market conditions and effective fund management during the review period. Large cap and large-mid cap strategies particularly demonstrated robust performance relative to their benchmarks.

Key Observations

The portfolio's performance highlights effective fund selection with an average outperformance across most equity categories. The underperformance of Kotak Midcap Fund warrants attention, as mid cap segments typically exhibit higher volatility. Portfolio diversification across market caps and fund houses has contributed to overall risk mitigation while maintaining strong returns. Future monitoring should focus on the consistency of outperforming funds and potential rebalancing considerations for underperforming positions.
